

Important: Text generated by AI and may contain incorrect information, always check the content.
To determine if there are any missing values in the DataFrame, we will check for null values.

```
```python
import pandas as pd

Check for missing values
missing_values = df.isnull().sum()

Display missing values count
display('Number of missing values per column:')
display(missing_values)
```
```

'Number of missing values per column:'
