

```
Shape of the dataframe: (2838, 11)
Columns of the dataframe: Index(['subreddit', 'post_id', 'sentence_range', 'text', 'label', 'confidence',
                                'social_timestamp', 'text_length', 'datetime', 'year', 'month'],
                                dtype='object')
Data types of the columns:
subreddit          object
post_id            object
sentence_range     object
text              object
label             int64
confidence         float64
social_timestamp   datetime64[ns]
text_length       int64
datetime           datetime64[ns]
year              int64
month             int64
dtype: object
Missing values count:
subreddit      0
post_id        0
sentence_range 0
text           0
label          0
confidence     0
social_timestamp 0
text_length    0
datetime       0
year           0
month          0
dtype: int64
